

Brain Morsels

Acknowledgements

We are grateful to the members of the senior living community of La Posada Green Valley in Arizona for the impetus to write these *Brain Morsels*, to attendees at our talks on the Normally Aging Brain whose questions pointed us to address some of those issues in these packets, and to the scientists and journalists whose research into the aging brain over many years is giving us insight into this last stage of human development and how to optimize the brain's function as we age. Finally, we would like to express our deep thanks to Paul Mermin, PhD, who carefully critiqued each packet and made each far stronger.
